

The Investigator

ESSENTIAL LEARNING FOR TODAY'S INVESTIGATORS

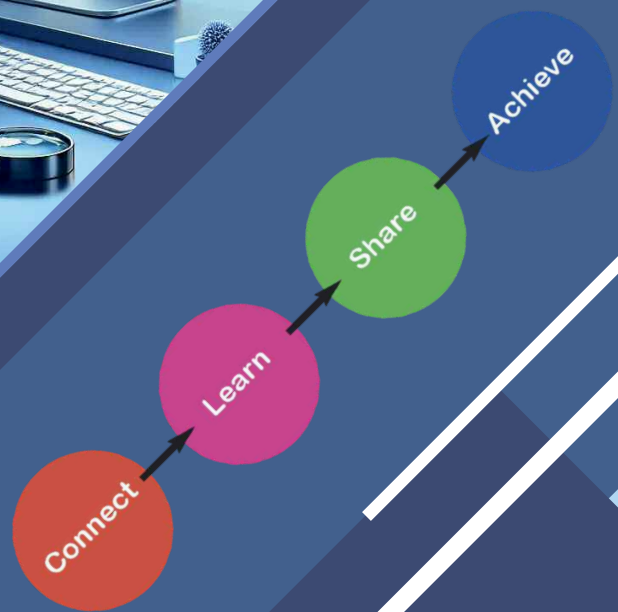

13th National Analyst's CONFERENCE

20-21 May 2026

Sponsored by

AGENDA

Day One

- 9am-9.10am:** Welcome and introduction, Carol Jenkins, The Investigator
- 9.10am-9.50am:** The Future Analyst: The Digital Power and Human Insight in an Age of Intelligence Innovation, Mark Parkinson, Head of Intelligence Analysis and Research, Met Police
- 9.50am-10.30am:** Wearable technology: The impact of an evolving technology landscape for investigations, Kyle Abbas, Intelligence Analyst, National Crime Agency Threat and Risk Assessment, Capability Exploration and Research (TRACER)
- 10.30am-11am:** Break and refreshments in the exhibition area
- 11am-11.40am:** Linking Unexpected Deaths Through People, Places and Patterns, understanding, mapping and linking unexpected deaths, focussing on repeat perpetrators, risk locations and emerging trends, Isobel, Winnard, Intelligence Analyst, Met Police Risk Identification Link Analysis Team
- 11.40am-12.40pm:** HEADLINE SPONSOR: Delivering a Threat-Agnostic Intelligence Capability using existing i2 software with wider capabilities to enable analysts to create and maintain an infinitely extensible, adaptable, sustainable and automated threat-agnostic intelligence capability, Seth Cooke, Technical and Tradecraft SME, i2
- 12.40pm-12.50pm:** Questions from the morning session
- 12.50pm-1.50pm:** Lunch
- 1.50pm-2.30pm:** Analytical techniques and best practice in Operation Bridgetown, an armed robbery in St Neot's Cambridgeshire, Oli Atkinson Intelligence Analyst, Serious Organised Acquisitive Crime, Cambridgeshire Constabulary
- 2.30pm-2.50pm:** Beyond the Job Title: Developing Intelligence Skills Across the Workforce: Introducing the Level 4 Intelligence Analyst Apprenticeship and how it supports analysts, investigators, intelligence officers and other intelligence professionals, Dr Harriet Aldrich, Lecturer in Security and Intelligence Studies, The University of Buckingham
- 2.50pm-3.20pm:** Break and refreshments in the exhibition area
- 3.20pm-4pm:** Speed networking session led by Elaine Robinson and Kyle Abbas, International Association of Law Enforcement Intelligence Analysts (IALEIA)
- 4pm:** Day One finishes
- 8pm-9.30pm** The National Analyst's Quiz in The Conservatory

AGENDA Day Two

- 8.50am-8.55am:** Welcome and Introduction, Carol Jenkins, The Investigator
- 8.55am-9.45am:** An update on current work from the NPCC National Data and Analytics Office, Kate Fisher Stevens, Director of Data Analytics, followed by a demonstration of Prometheus, a new analytical tool that applies advanced data technologies to give analysts faster insights, reduce duplication of effort, and improve the way information is shared across systems, Nicola Foster, Staff Officer and Rachel Wilson, Project lead
- 9.45am-10.35am:** Around the World in 30 days: Organised Crime and Smart Phone theft in London, Darren Barber, Lead Intelligence Analyst and Elliot Smith, Intelligence Analyst, MO2, Met Intelligence, Met Police
- 10.35am-11am:** Break and refreshments in the exhibition area
- 11am-11.40am:** Suspicious Activity Reports (SARs) Analysis: Operational Impact at Scale, Holly Lack Manager, Analysis Team, UK Financial Intelligence Unit (UKFIU)
- 11.40am-12.20pm:** Analyst's Wellbeing, Katy Wallace, Threat and Performance Senior Manager, Southeast Regional Organised Crime Unit (SEROUCU)
- 12.20pm-1pm:** Lunch
- 1pm-1.20pm:** Cross case analysis, FSR Compliance and Case Management with CSAS, the industry standard for digital investigations, Andrew Fahey, Public Affairs Director, Forensic Analytics
- 1.20pm-2pm:** New research findings on motivation outlining the kinds of spiking behaviours people engage in, who is affected, where incidents occur and, crucially, the reasons for this behaviour, Dr Amy Burrell, Research Fellow at the University of Birmingham.
- 2pm:** Conference closes

14th National Analyst's Online Conference

25-26 November 2026

25 November 2026
9.30am GMT

The Investigator
ESSENTIAL LEARNING FOR TODAY'S INVESTIGATORS

ONE PLATFORM. ALL DATA INTELLIGENCE. INSTANT ANSWERS.

**Modern investigations don't wait.
Neither should your analysts.**

SS8's platform is purpose-built for agencies confronting high-volume digital evidence, encrypted communications, and multi-network activity across narcotics trafficking, organised crime, and transnational criminal organisations.

Able to fuse data of all kinds including seized device data, location intelligence, lawful intercept, ANPR and commercial geospatial feeds, SS8 can map movement patterns, expose cartel hierarchies, and reconstruct cross-border corridors. Analysts can correlate aliases, handles, devices, and financial indicators across public, dark web, and restricted data sources to surface hidden networks. Additionally, they can monitor social media and messaging platforms for recruitment, and influence campaigns, linking online personas to real-world devices and locations.

SS8's AI solutions cut through investigative data to surface what matters most, without compromising human judgment or legal defensibility. Full evidentiary workflows for sovereign, air-gapped, and regionally isolated deployments make SS8 the platform of choice for the most sensitive national security environments.

**Empowering Criminal Analysts to
Accelerate Investigations.**

SS8[®]

AI-Powered Intelligence
for Criminal Investigations

i2 group

**1 Cambridge Sq, Milton Ave,
Cambridge, CB4 0AE, UK
E: hello@i2group.com
www.i2group.com**

i2 Group delivers advanced intelligence analysis solutions that help organisations uncover critical insights, detect threats, and make confident, data-driven decisions. Trusted by law enforcement, defence, national security, and commercial organisations worldwide, i2 enables analysts to transform complex, fragmented data into actionable intelligence.

Our flagship platform empowers users to analyse large volumes of structured and unstructured data, identify hidden relationships, and visualise networks, patterns, and behaviours that would otherwise remain unseen. By combining powerful analytics with intuitive visualisation, i2 supports investigations ranging from serious and organised crime to fraud detection, cyber investigations, and operational intelligence.

At i2, we believe effective analysis is central to safer communities and stronger organisations. We work closely with our customers and partners to enhance analytical capability, improve collaboration, and accelerate investigative outcomes.

Through continuous innovation and a strong analyst-focused approach, i2 remains committed to advancing the intelligence analysis profession and helping analysts turn information into insight - and insight into action.

THE UNIVERSITY OF BUCKINGHAM

The University of Buckingham

Hunter Street, Buckingham,
MK18 1EG, UK

Tel: +44 (0)1280 814080

E: apprenticeships@buckingham.ac.uk

www.buckingham.ac.uk

The University of Buckingham is the UK's only independent university with a Royal Charter, renowned for its distinctive approach to higher education and strong focus on student success. At the heart of our offering is the pioneering two-year degree - an accelerated pathway that enables students to achieve a full honours degree while saving both time and cost.

We offer a wide range of undergraduate and postgraduate programmes across disciplines including business, computing, law, education, psychology and the social sciences, all delivered in small, supportive learning environments. Alongside our academic provision, our growing portfolio of apprenticeship programmes enables individuals to earn while they learn, combining high-quality teaching with real-world workplace experience to develop career-ready professionals.

We are also proud to be home to the Centre for Security and Intelligence Studies (BUCSIS), a recognised centre of excellence delivering specialist education and research in security, intelligence and related fields. Through initiatives such as our Intelligence Analyst Apprenticeship and wider professional programmes, BUCSIS supports the development of analytical capability across policing, government and industry.

Our research is applied, impactful and closely aligned with industry and societal needs, ensuring our teaching remains relevant, innovative and future-focused.

Chorus Intelligence

6 Quay Point, Station Road,
Woodbridge, Suffolk, IP12 4AL, UK
Tel: +44(0)20 3597 7350
E: info@chorusintel.com
www.chorusintel.com

Chorus Intelligence is an award-winning supplier of data cleansing, analysis, search, enrichment and evidential reporting software for law enforcement, government agencies and corporate institutions across the globe. A powerhouse of investigative tools, the Chorus Intelligence Suite (CIS) supports multiple roles of varying expertise to get answers from data. Progress digital investigations from one platform and spot connections seamlessly with dynamic visualisation in a single dashboard.

Paliscope AB

Paliscope AB, Lilla Bommen 3B
411 04 Gothenburg, Sweden
Tel: +46 730408805
E: markus.franke@paliscope.com
www.paliscope.com

Paliscope is a Swedish software company supporting investigative, intelligence, and security organisations. Paliscope's modular suite - Build, Explore, and Find - helps teams convert overwhelming digital material into usable intelligence, document evidence with auditability and chain-of-custody, and scale search and alerting across massive datasets. Paliscope applies AI where it measurably improves speed and understanding while keeping human responsibility, transparency, and governance at the core.

- Paliscope Find: Persistent intelligence, search, and alerting system for large-scale data; supports continuous ingestion, indexing, monitoring, retention, and rule based alerts.
- Paliscope Explore: Investigation and intelligence

analysis workspace to analyse, connect, and contextualize multi-source data; used for intelligence work, lead generation, and early/ongoing investigations.

- Paliscope Build: Collaborative documentation and reporting system for digital investigations; integrates inputs from multiple tools and systems; built for auditability and defensible reporting.

SS8 Networks

750 Tasman Drive, Milpitas, California, 95035, USA
Tel: +1 408-944-0250
E: info@ss8.com
www.ss8.com

As a leader in Lawful and Location Intelligence, SS8 is committed to making societies safer. Our mission is to extract, analyze, and visualize critical intelligence, providing real-time insights to help save lives.

With 25 years of expertise, SS8 is a trusted partner of the world's largest government agencies and communication providers, consistently remaining at the forefront of innovation.

Forensic Analytics

Pixmore Centre, Pixmore Avenue, Letchworth,
Hertfordshire, U.K, SG6 1JG
Tel: +44(0)800 158 3830
E: Enquires@forensicanalytics.io
www.forensicanalytics.io

Forensic Analytics provide advanced digital forensics solutions, focused on helping law enforcement agencies combat crime. We offer software, training, and professional services designed to turn digital data into intelligence and court-ready evidential outputs.

Our suite of digital forensics hardware and software tools include CSAS, CSAS Find, CellView, and the LIMA Cell Monitor, enables investigators to quickly understand complex digital datasets, map activity, uncover connections, and generate evidential standard outputs. Together, these tools help forces save significant time, money, and investigative resources, allowing teams to focus effort where it has the greatest impact.

These tools support critical investigative areas such as MISPERS, VAWG, organised crime, and drug lines. We also

provide accredited training to over 2,000 officers annually, alongside expert led consultancy services.

Founded in 2013 by a team of expert witnesses, Forensic Analytics has grown into a leading UK provider of digital forensics solutions and is now expanding its support to agencies in the USA, Australia, and other international markets.

OUR JOURNEY

The Investigator has, for the past 17 years, been providing training, workshops and conferences aimed at supporting the continuous professional development of investigators, analysts and police staff of all ranks and roles.

To date we have staged more than 500 events both online and in-person that have provided contemporary issues and best practice in digital investigation, investigative interviewing, crime and intelligence analysis, major crime, serious and organised crime, open source intelligence, dark web, cryptocurrency, covert policing, CSE, MOSOVO, Human trafficking and modern slavery and cyber-crime.

If you are interested in speaking at a future event email carol@the-investigator.co.uk

Reigniting Intelligence

Towards a Threat-agnostic Intelligence Capability

At this year's conference,
i2 is focusing on how analysts
and intelligence teams can:

Break free from threat-specific
tooling and workflows.

Extend and connect the systems
they already use.

Build intelligence capabilities
that evolve as priorities change.

Together, we can build a foundation
that scales, adapts, and endures.
